

and Answers About Children's Teeth

MOTHER writes: "My baby but her eye and stomach teeth. Does child and I am so afraid. Is there anything I can do to and if she should have them until the doctor comes?"

child's food with a little water. Be sure that she has a free bowels every day. Keep comfortable as possible; give her cool water to drink, and not allowing many people to excite her. If the gums become swollen have the doctor think it wise. If you look at them carefully I do not think of convulsions. But if she to have one undress her and crib in a cool, quiet room; in a basin of mustard-water full of mustard to two quarts of out a sheet in the mustard-her up in this, placing a under her and a light blanket her to remain in the mustard ten minutes or until her skin is red, and then remove her a dry sheet and light blanket arrives. At the same time at her head, or cloths wrung d water, and as soon as she give her two teaspoonfuls of e her to food until the doctor a little cool water. This g the mustard pack is often astard bath because the child etly in bed instead of being When the doctor arrives he h if he thinks it necessary.

# ESKAY'S FOOD

**Enutzeak, the Eskimo baby** shown in the above picture, was successfully nourished at the World's Fair last summer through the use of Eskay's Food, and so were a number of babies in the Alaskan Village of the Philippine Exhibition. In fact babies of all nations and climes used the children's Play-ground, where the popular Food was Eskay's. The picture shows Enutzeak at 11 months, when he weighed 32 pounds. Babies fed on Eskay's Food are notably free from illness. It nourishes from the first feeding.

**Baby's Health Depends on Baby's Food**

Nature's method should where possible followed, for man has not and will never devise anything to equal the mother's milk. In connection with the nursing, physicians now advocate giving the child one feeding bottle each day of cow's milk modified by

**The Unsweetened FOOD**

# IMPERIAL GRANUM

and then as the mother's milk fails, gradually increasing the number of feedings until it is used exclusively. The otherwise indigestible cow's milk is by this method made easily digested and the condensed milk (which should never be used alone) receives the necessary but lacking phosphates. **Imperial Granum** is all available nutrition with no malt, sugar, or dried milk which are apt to prove harmful. It is quickly absorbed by the infant system and forms rich, red blood, strong bone and muscle with no fatty flesh. **Imperial Granum** also overcomes and prevents teething and bowel troubles. Infant feeding ceases to be an experiment when it is used. Irrespective of the food now used every mother is urged to write Inc. Carle & Sons, 153 Water St., New York, for a FREE copy of their book, "The Care of Babies." It is filled with information on baby's care especially in warm weather. Druggists supply **Imperial Granum**, Trial size 25 ct. or a generous sample is sent free.

**Just Like Mother**

**That's Why Baby Likes the Hygieia**

The rubber part is so like the human breast in size and shape that in wearing or when natural supply is low, baby will go from breast to the Hygieia bottle without noticing the difference. The Hygieia is without neck or angle; needs no funnel to fill, brush to clean tip interior which is filled out like a tumbler. The rubber is yielding, yet not collapsible; seams are turned inside out to clean thoroughly. It has no crack or crevice where dirt, ether or germ can propagate. The Hygieia is used and endorsed by every physician.

## Beautiful Lawns

Are the pride of the home; why disfigure with ugly clothes posts?
