Feeding The Baby

The Allenburys' Foods

The Most Rational System of Infant
 Feeding Yet Devised

Most babies when born are healthy,
 but on account of improper feeding
 many suffer and do not thrive.

The "Allenburys" system of infant
 feeding is based on the proved scientific
 fact that a baby's food should change
 as age advances and the child develops.
 It comprises a series of three foods,
 suited to the needs of the child at dif-
 ferent ages, and is a distinct advance
 over the old method of trying to adapt
 a child's stomach to a uniform food.

If you have a baby, or know of a baby
 of which a mother would say "It is not
 doing well," we simply ask that you
 write us, stating the baby's age, and
 we will send a package of the food
 suited to its condition, together with
 booklet giving valuable information on
 "Infant Feeding and Management."
