

## Are There Modern Miracles?

(Continued from Page 20)

both hands on the head of offered an individual prayer ally mentioning the nature which relief was sought. ce I sought out the officiat- he Reverend Eliot White, sed him, "that these people ed through prayer?" ere at Grace Church," Mr. "speak for themselves. For wit-

oc- eacy ling. ures any een in a ous ough may ver a must he cause that so definitely hysical change, namely, to

ing not in opposition to but ith the doctors," the clergy-

"However, we also have ch medical treatment has d, where the prayer treat- s the cure. A case I have in woman who for months had suppurating gland and a dc of her neck. On account ligned to carry her head bent hler. Her family doctor had nd inserted a drainage tube, e continued. By the month ouble had become so acute al consultation an operation But the "tient feared to month she continued octor's "ations to have t painted with iodine. id, "There is no improvement hing more that I can do ex- he dressing as it is required." quite terrified. Her husband ss if you believe in your re- time to try it." On January came to me. I laid my hands l also on the bandage on her d for her recovery."

### Is It Possible Today?

morning she hurried to show the doctor. As he removed e remarked: "Why, something e has happened. This gland eal. I don't understand it." he removed the bandage and e wastebasket with the an- t the healing was complete. / twenty-ninth she came to show us her cure. She was id erect for the first time in ex- lered her neck easily. Then nined the neck. There was own scar where before, only e, had been an open wound ore and a swelling as large as ssistant, the Reverend Frank o a witness to what occurred. ree that here there had been

nity Chapel in East Twenty- sked the rector, the Reverend ton, "Is disease cured by

aling," he answered, "is one activities of the church, for mmissioned today exactly as ineten hundred years ago. rict our belief here at Trinity of either the Old or the New God be what we know Him to e not only possible today but most natural things in the e seen there at Trinity, es that e been witnessed for dou- healing power e and functional diseases. One is that of a young married ul suffered for six years from an apoplectic stroke at child- old walk only with the aid of

two crutches when she came for her anoint- ing. On the following morning she put the crutches in a closet and walked off without them. She has not used them since. A physician from out of town came for prayer and anointing for himself for angina pec- toris. Suppose you see what he says." And Father Sutton passed me a letter which read over the physician's own signature: "Lous Deo! A veritable miracle has been wrought.

I have been, as it were, remade. I can do without suffering things I have not done in years. It's wonderful. What more can I say than that I am profoundly thankful to God?"

"Is disease cured by prayer?" I asked the Reverend William T. Walsh, the rector at St. Luke's, New

York. "At our spiritual healing service held at St. Luke's each Thursday," he answered, "someone is blessed with healing every week. This healing in answer to prayer is so frequent as to put the phenomenon outside the range of coincidence. It has been demon- strated now beyond question. It is in ac- cordance with laws of the universe as exact as the law of gravity. These spiritual laws are recorded for our use in the Bible. But in order to apply them successfully it is essen- tial to master their technic. For this we are told, 'Seek and ye shall find.' Among our cases that I may mention is that of a girl of thirteen, obliged to wear steel braces on her legs and unable to walk even two blocks without them."

### Francis Bosworth's Call

TESTIMONIES from prayer groups all over the country were the evidence ex- amined by the Episcopal Commission on Healing, among the prominent members of which were Bishop Manning, of New York, and Bishop Boyd Vincent, of Ohio.

The report of this commission adopted by the Episcopal General Convention in Port- land in September last contained this state- ment: "We believe that the body no less than the soul of man was included in the work of redemption; that the restoration of harmony of man's mind and will with the divine will often brings with it the restoration of the body; that the full power of the church's corporate intercession in this connection has been too little realized and that confidence in the efficacy of prayer for restoration of health has not been sufficiently encouraged. Here then is the first great need of the church today in the revival of her ministry of heal- ing."

Also see Paul Rader's group now. "Is disease healed through prayer?" I asked Paul Rader.

"We have thousands of our Christian and Missionary Alliance members who bear witness that it is," he replied. "None of us has the least objection to the use of medicine. Only in my own family when anyone is ill there is but one doctor we will have. We run for the Great Physician."

So popular are the Christian and Mission- ary Alliance tenets becoming today that in town after town the little Alliance church can no longer contain the people that crowd to hear its evangelists. The largest hall that can be hired is required.

Out onto its platform has stepped Francis F. Bosworth. Born on a farm in Nebraska, he had risen to be a bank teller and city clerk in Fitzgerald, Georgia, before he came to the pastorate of a little church in Dallas, Texas. Some years ago the Lord spake unto him calling him to a larger field. He drew back protesting. How should he, with no college or theological training, dare to lift his voice among learned preachers in great cities? But the call was insistent. At last, he says, the Lord commanded: "It is healing you must teach, with prayer and anointing."

"But, O Lord," he protested, "what if none of them should get well?"

## R & R Boned Chicken

### Solves the Problem of the Impromptu Meal

A late return from an outing or a shopping expedition—the dinner hour approaching!

No need to worry. Take from the pantry shelf a tin of R & R Boned Chicken, and quickly transform the contents into a delicious salad, some tasty pat- ties or any tempting dish that can be made from chicken meat.

The work of preparation is ours; the convenience and economy are yours.

### A Recipe—Chicken Creole

Cook 1 tablespoonful butter and 1 small onion (minced) for 5 minutes. Add 1 tablespoonful flour, 1 pint milk, 1 green pepper (minced), contents of 1 small tin R & R Boned Chicken cut in small pieces, and seasoning. Heat and pour over slices of toast.
