

# SOUP to suit the weather

*Rain or shine, hot or cold,  
you're always prepared with a full SOUP SHELF*

BY *Anne Marshall*

**Y**OUR BEST BET for April's sudden shifts in weather is soup... as versatile as it is delicious! And a full soup shelf takes the worry out of weather because you're ready for almost any cooking emergency.

Come cold, soup warms and sustains your shivering children. When rain turns your home into an island there are always good meals in that kitchen cupboard. On a sudden warm day, soup can be the main attraction of a cool sandwich or salad meal.

But you really need plenty of soup on hand; family favorites, a few made with chicken or beef stock, some of vegetable, and extra cans of tomato and cream of mushroom to use as a cooking sauce in luscious casseroles, soufflés, and creamed dishes.

Are you ready for April?  
One glance at your soup shelf will tell you.
