Education: As a student leader you are a role model amongst the students who attend our academy.

Your job title may include organizing classes, assisting with lesson planning, and assistant directing and teaching. There is plenty of opportunity to work behind the scenes by learning the process of putting a performance together. The process includes running a performance and collaborating costume, set, prop, lighting and music ideas with the various instructors. Some of our students have interned as stage managers and assistant directors as well.
