Teaching and Learning in a Global Community: Closing the Achievement Gap

Speaker: Dr. Belinda Williams

Despite numerous education reform efforts, significant academic achievement gaps persist among high and low poverty, racial and ethnic subgroups. Recent research and theory identify conditions for teaching and learning (the impact of context/cultural environments on human development, attention to current understandings of intelligence, the role of motivation/effort in achievement, fostering resilience, etc.) that must be met to assure success in schools and classrooms.

Every year as we welcome spring, the Monmouth University community comes together to celebrate the cooperative spirit of our global village through the Global Understanding Convention. The convention offers opportunities for students, staff, faculty, administrators, and outside communities to celebrate our diversity and to find creative solutions to our common challenges. Through engaged learning, shared scholarship, compassionate understanding, and commitment to service, we will cherish the diversity and dignity of all peoples, and the unity of purpose to create the foundations of shared prosperity and peace across cultures, borders, and generations.

We would like to extend our appreciation to Monmouth University students for their outstanding contributions and support to the 2008 convention.

The love of one's country is a splendid thing. But why should love stop at the border?

Pablo Casals

I am part and parcel of the whole and cannot find God apart from the rest of humanity.

Mohandas Gandhi

We are here to awaken from the illusion of our separateness.

Thich Nhat Hanh

There must be, not a balance of power, but a community of power; not organized rivalries, but an organized common peace.

Woodrow Wilson
