

Title: Collaboration Abroad: Blending Experiential Learning Across Disciplines — An Exemplar

Format: Roundtable Discussion

Date: March 16, 2024 (Daytona)

Time: 10:30-11:30am

Learning Objectives:

- Gain an in-depth understanding of the intricacies involved in interprofessional collaboration between MSW and OTD students.
- Explore the unique perspectives, roles, and contributions each discipline brings to the table, while recognizing the synergies that arise from their collective efforts.
- Evaluate the experiential learning outcomes achieved through the cross-disciplinary collaboration in Da Nang, Vietnam.
- Examine how MSW and OTD students leveraged their combined expertise to design, implement, and assess interventions that address real-world challenges faced by local communities.
- Identify the implications and potential future applications of this interprofessional collaboration model.
- Discuss how the insights gained from this unique experience can inform the development of innovative strategies in both social work and occupational therapy fields.
- Explore ways to adapt and replicate similar collaborative approaches in other contexts to enhance the quality and reach of client-centered care

Session Outline:

10:30-10:40- Introductions

10:40-11:00- Outline the Experiential Learning Outcomes for Each Discipline

11:00-11:20- Activity: Matching Learning Outcomes Between Disciplines

11:20-11:30- Closing
