NEW JERSEY: COVID CONCERNS DECLINE

Only one-third support bringing back social distancing guidelines

West Long Branch, NJ – Support for face mask and social distancing guidelines in New Jersey has dropped significantly since the fall. Less than half of the state supports workplace vaccine mandates according to the *Monmouth (“Mon-muth”) University Poll*. Concern about Covid illness is at an all-time low as many report having been infected with the virus themselves. The poll also finds New Jerseyans give good grades to the governor and the state as a whole for handling the pandemic.

Only 1 in 3 (34%) New Jerseyans support reinstating general face mask and social distancing guidelines in New Jersey. Another 64% are opposed. This is a reversal from polls taken last fall, when more than 6 in 10 voters in the state backed bringing back these measures. Support for reinstating these Covid guidelines has declined among every partisan group, but the largest drop has occurred among Democrats – from 89% who supported these measures in September to 50% who back them now.

Just under half of the state (45%) supports requiring proof of Covid vaccination to work in an office or other setting around people. A slight majority (52%) opposes such a workplace vaccine mandate. There is a wide partisan gap on this measure, ranging from 72% of Democrats to just 17% of Republicans who support it.

Garden State support levels for both social distancing and masking guidelines and workplace vaccination mandates are nearly identical to [national public opinion](#) results from a poll Monmouth conducted last month.

“There’s a combination of factors at play here. The delta variant was not as bad as predicted while the omicron surge made it seem as if infection was inescapable. New Jerseyans are willing to get boosted themselves, but that may be the best they can do against future waves,” said Patrick Murray, director of the independent Monmouth University Polling Institute.

About 1 in 4 New Jerseyans (23%) are very concerned about a family member becoming seriously ill from the coronavirus outbreak. This is down from about 4 in 10 who felt the same throughout

last year and 6 in 10 who expressed this concern in the first months of the pandemic. At the same time, about half the adults polled report having Covid or thinking they had Covid at some point, including 38% who say their infection was confirmed with a test. Both findings for New Jersey – confirmed infection prevalence and concern about family illness – are identical to recent national poll results.

About 6 in 10 New Jersey adults (59%) report having already received a booster shot of the Covid vaccine. [*Note: this number appears to be a little higher than CDC reporting, but there is some confusion over the population bases used to calculate booster rates which could contribute to the difference.*] At the other end of the spectrum, 24% say they are not at all likely to get a booster. Garden State residents are somewhat more willing to get the booster than all Americans on average (48% already boosted versus 33% not at all likely in a [March national poll](#)).

In New Jersey, anxiety about a family member getting seriously ill from Covid has declined over the past year by 22 points among Democrats (from 52% very concerned in May 2021 to 30% now), by 15 points among Republicans (from 27% to 12%), by 11 points among white residents (from 29% to 18%), and by 20 points among people of color (from 50% to 30%). Republicans (46%) are much more likely than Democrats (8%) to be not at all likely to get a Covid vaccine booster shot. There is less difference by race in opposition to getting this additional dose – 28% of white New Jerseyans are not at all likely compared with 19% of Black, Hispanic, and Asian residents.

Gov. Phil Murphy continues to receive broadly positive reviews for his handling of the Covid outbreak, with 67% who say he has done a good job and just 25% who say he has done a bad job. His pandemic rating has never dropped below 60% positive since the pandemic started two years ago.

Just over half of the public (53%) says New Jersey has done better than other states in dealing with the pandemic. Just 14% say it has done worse and 31% say it has done about the same as other states. These results are basically in line with Monmouth polls taken last year.

“Murphy’s handling of the pandemic has always been a source of strength in public opinion about the governor. It just wasn’t the most important issue when voters went to the polls last November,” said Murray.

The *Monmouth University Poll* was conducted by telephone from March 31 to April 4, 2022 with 802 New Jersey adults. The question results in this release have a margin of error of +/- 3.5 percentage points. The poll was conducted by the Monmouth University Polling Institute in West Long Branch, NJ.

QUESTIONS AND RESULTS

(* Some columns may not add to 100% due to rounding.)

[Q1 & Q21-37 held for future release.]

[Q2-20 previously released.]

38. How concerned are you about someone in your family becoming seriously ill from the coronavirus outbreak – very concerned, somewhat concerned, not too concerned, or not at all concerned?

TREND:	April 2022	Sept. 2021*	Aug. 2021*	May 2021	April 2020
Very concerned	23%	43%	43%	38%	60%
Somewhat concerned	27%	27%	25%	24%	26%
Not too concerned	26%	17%	17%	19%	8%
Not at all concerned	23%	12%	12%	17%	5%
(VOL) Has already happened	1%	1%	1%	2%	1%
(VOL) Don't know	0%	1%	1%	0%	0%
(n)	(802)	(804)	(810)	(706)	(704)

* Registered voters

39. At any time during the pandemic, did you ever have Covid or think you had Covid? [If YES: Was your Covid status confirmed with a test, were you given the diagnosis by a medical professional without a test, or did you just know you had Covid?]

	April 2022
Yes, confirmed with a test	38%
Yes, given the diagnosis without a test	2%
Yes, just knew had Covid	9%
No, have not had Covid	50%
(VOL) Don't know	1%
(n)	(802)

40. Has Governor Murphy done a good job or bad job dealing with the coronavirus outbreak?

TREND:	April 2022	Sept. 2021*	Aug. 2021*	May 2021	April 2020
Good job	67%	62%	61%	66%	79%
Bad job	25%	27%	28%	27%	10%
(VOL) Mixed, depends	5%	6%	6%	6%	7%
(VOL) Don't know	2%	5%	6%	1%	3%
(n)	(802)	(804)	(810)	(706)	(704)

* Registered voters

41. Has New Jersey done better, worse, or about the same as other states in dealing with the pandemic?

TREND:	April 2022	Aug. 2021**	May 2021*
Better	53%	51%	53%
Worse	14%	17%	23%
About the same	31%	27%	23%
(VOL) Don't know	2%	5%	1%
(n)	(802)	(810)	(706)

* Registered voters

** Question wording was "Do you think New Jersey is doing..."

42. Do you support or oppose reinstating face mask and social distancing guidelines in New Jersey at the current time?

TREND:	April 2022	Sept. 2021*	Aug. 2021*
Support	34%	61%	62%
Oppose	64%	36%	35%
(VOL) Depends	2%	n/a	n/a
(VOL) Don't know	1%	4%	3%
(n)	(802)	(804)	(810)

* Registered voters

43. Do you support or oppose requiring people to show proof of vaccination in order to go to work in an office or setting where they are around other people?

	April 2022
Support	45%
Oppose	52%
(VOL) Depends	2%
(VOL) Don't know	1%
(n)	(802)

44. Have you received at least one dose of Covid vaccine, or not?

TREND:	April 2021	Sept. 2021*	Aug. 2021*	May 2021
Yes	80%	84%	79%	63%
No	18%	14%	17%	36%
(VOL) Don't know	2%	2%	5%	2%
(n)	(802)	(804)	(810)	(706)

* Registered voters

45. Have you received a booster shot of the Covid vaccine, or not? [If NOT:] How likely are you to get a booster shot of the vaccine – very likely, somewhat likely, not too likely, or not at all likely?

	April 2022
Already received booster	59%
Very likely	4%
Somewhat likely	5%
Not too likely	6%
Not at all likely	24%
(VOL) Don't know	1%
(n)	(802)

METHODOLOGY

The *Monmouth University Poll* was sponsored and conducted by the Monmouth University Polling Institute from March 31 to April 4, 2022 with a probability-based random sample of 802 New Jersey adults age 18 and older, in English. This includes 280 contacted by a live interviewer on a landline telephone and 522 contacted by a live interviewer on a cell phone. Telephone numbers were selected through random digit dialing and landline respondents were selected with a modified Troldahl-Carter youngest adult household screen. Monmouth is responsible for all aspects of the survey design, data weighting and analysis. The full sample is weighted for region, age, education, gender and race based on US Census information (ACS 2018 one-year survey). Data collection support provided by Braun Research (field) and Dynata (RDD sample). For results based on this sample, one can say with 95% confidence that the error attributable to sampling has a maximum margin of plus or minus 3.5 percentage points (unadjusted for sample design). Sampling error can be larger for sub-groups (see table below). In addition to sampling error, one should bear in mind that question wording and practical difficulties in conducting surveys can introduce error or bias into the findings of opinion polls.
