## Students:

-5th Grade Special  
Education (SDL)  
-Struggle to  
understand english  
-Easily distracted  
-Blurts out in class

## Course + Project

-Course; EDS-330 Foundations of Special Education Across the Lifespan

-Project: In my 5th grade English placement, the students have been focusing on improving their grammar rules, especially in parts of speech. Therefore I created a Quiziz with eight intriguing questions that challenge the students to try and decipher what a Noun, Verb, and Adjective are and have them select examples of each. Utilizing a Quiziz is essential because it is engaging for the students since it is a competition to get in the first place, and the students can play repeatedly.

## My Impact

My goal is to encourage my students to practice their grammar skills by participating in a game that has a competition aspect so that I can get my students excited to learn. Creating a game like this that can be used in the classroom and at home is essential. It's key as a teacher to try and make learning fun!

## What I have learned:

Throughout my service learning, I have learned a vast amount, especially about being patient. As a teacher, I have learned that you need to select exciting assignments to keep the kids engaged. Selecting boring lessons leads the students to be uninterested. I have also learned a lot about classroom management and ways to dissolve problems.
